PROFILE

I am a web developer that utilizes HTML, CSS, JavaScript and Node.js to create beautiful websites and web applications. I love generating ideas and seeing them through to completion. My greatest assets are organization, communication and the ability to learn fast.

EDUCATION

Master Of Science: Electrical and Computer Engineering
University Of Thessaly
09-2014 – 08-2020 | Volos

PROFESSIONAL EXPERIENCE

Internship as Junior Web Developer
re-compile
06-2018 – 08-2018 | Nafplio, Greece
Used HTML5, CSS3, jQuery to create website templates that were used on a site creation service, the templates offered a bigger variety and attracted more customers. On my time there I learned to function as a member of a team, as well as working to meet deadlines.

LANGUAGES

English
Proficient in speaking and writing

PROJECTS

Online Chatroom ⧉
Used HTML5, CSS3,ES6, Node.js, Express.js, Socket.io, MongoDB to create a web application that allow its users to exchange private messages. It comes with an authentication mechanism, plus it stores and loads all messages between two users.

Portfolio Website ⧉
It is created with HTML5, CSS3, ES6 and it is a fast, fully responsive static website that displays all my projects

Traffic Education Game ⧉
It is a game that was developed inside Unity with C# and SQLite. Its purpose is to educate children of small ages about traffic matters. It uses database analysis on each player to determine the areas that he/she lacks knowledge and shift the learning focus there.

Hotel Website ⧉
It is one of the website templates I created in my internship and it is developed with HTML5, CSS3, jQuery. This website displays the services that a fictional hotel offers.

INTERESTS

Travelling, Gaming, Running
